Docket No. AUS920000950US1

CLAIMS:

What is claimed is:

5 1. A method of providing content to a client, comprising:

retrieving the content;

performing an evaluation of the content for accessibility by a user; and

10 providing the content to the client if a result of the evaluation meets an accessibility requirement for the user.

2. The method of claim 1, wherein retrieving the
15 content includes performing a search of content providers.

3. The method of claim 2, wherein the search of content providers is performed using a Web search engine.
20
4. The method of claim 1, wherein performing an evaluation of the content for accessibility by a user includes determining an accessibility level of the content based on accessibility criteria.
25
5. The method of claim 4, wherein the accessibility criteria are established based on standardized accessibility guidelines.

30 6. The method of claim 1, wherein performing an evaluation of the content for accessibility by a user includes using an evaluation tool to perform the evaluation.

Docket No. AUS920000950US1

7.   The method of claim 6, wherein the evaluation tool
is Bobby™.

8.   The method of claim 1, further comprising providing
5   an indication to the client that the content does not
meet accessibility requirements if the result of the
evaluation is that the content does not meet the
accessibility requirement for the user.

10   9.   The method of claim 1, wherein the accessibility
requirement for the user is obtained from a user profile.

10.   The method of claim 1, wherein the method is
implemented on a proxy server.
15

11.   The method of claim 1, wherein the method is
implemented on the client.

12.   The method of claim 1, wherein the content is at
20   least one Web page.

13.   The method of claim 1, further comprising modifying
the content such that the content meets the accessibility
requirement for the user.
25

14.   The method of claim 13, wherein modifying the
content includes changing values for tags in the content
based on one of a rule set and an algorithm.

Docket No. AUS920000950US1

15. The method of claim 13, wherein performing the evaluation of the content for accessibility by the user includes logging elements of the content that do not meet accessibility criteria, and wherein modifying the content

5   includes modifying logged elements to meet the accessibility criteria.

16. An apparatus of providing content to a client, comprising:

10   means for retrieving the content;
          means for performing an evaluation of the content for accessibility by a user; and
          means for providing the content to the client if a result of the evaluation meets an accessibility

15   requirement for the user.

17. The apparatus of claim 16, wherein the means for retrieving the content includes means for performing a search of content providers.

20

18. The apparatus of claim 17, wherein the means for performing a search of content providers includes means for using a Web search engine.

25   19. The apparatus of claim 16, wherein the means for performing an evaluation of the content for accessibility by a user includes means for determining an accessibility level of the content based on accessibility criteria.

30   20. The apparatus of claim 19, wherein the accessibility criteria are established based on standardized accessibility guidelines.

Docket No. AUS920000950US1

21. The apparatus of claim 16, wherein the means for
performing an evaluation of the content for accessibility
by a user includes means for using an evaluation tool to
5   perform the evaluation.

22. The apparatus of claim 21, wherein the evaluation
tool is Bobby™.

10 23. The apparatus of claim 16, further comprising means
for providing an indication to the client that the
content does not meet accessibility requirements if the
result of the evaluation is that the content does not
meet the accessibility requirement for the user.
15

24. The apparatus of claim 16, wherein the accessibility
requirement for the user is obtained from a user profile.

25. The apparatus of claim 16, wherein the apparatus is
20 associated with a proxy server.

26. The apparatus of claim 16, wherein the apparatus is
associated with the client.

25 27. The apparatus of claim 16, wherein the content is at
least one Web page.

28. The apparatus of claim 16, further comprising means
for modifying the content such that the content meets the
30 accessibility requirement for the user.

Docket No. AUS920000950US1

29. The apparatus of claim 28, wherein the means for modifying the content includes means for changing values for tags in the content based on one of a rule set and an

5   algorithm.

30. The apparatus of claim 28, wherein the means for performing the evaluation of the content for accessibility by the user includes means for logging

10   elements of the content that do not meet accessibility criteria, and wherein the means for modifying the content includes means for modifying logged elements to meet the accessibility criteria.

15   31. A computer program product in a computer readable medium for providing content to a client, comprising:
         first instructions for retrieving the content;
         second instructions for performing an evaluation of the content for accessibility by a user; and

20   third instructions for providing the content to the client if a result of the evaluation meets an accessibility requirement for the user.

32. The computer program product of claim 31, wherein

25   the first instructions include instructions for performing a search of content providers.

33. The computer program product of claim 32, wherein the instructions for performing the search of content

30   providers include instructions for using a Web search engine.

Docket No. AUS920000950US1

34. The computer program product of claim 31, wherein the second instructions include instructions for determining an accessibility level of the content based on accessibility criteria.

5

35. The computer program product of claim 34, wherein the accessibility criteria are established based on standardized accessibility guidelines.

10 36. The computer program product of claim 31, wherein the second instructions include instructions for using an evaluation tool to perform the evaluation.

37. The computer program product of claim 36, wherein
15 the evaluation tool is Bobby™.

38. The computer program product of claim 31, further comprising fourth instructions for providing an indication to the client that the content does not meet
20 accessibility requirements if a result of the second instructions is that the content does not meet the accessibility requirement for the user.

39. The computer program product of claim 31, wherein
25 the accessibility requirement for the user is obtained from a user profile.

40. The computer program product of claim 31, wherein the computer program product is executed on a proxy
30 server.

41. The computer program product of claim 31, wherein the computer program product is executed on the client.

Docket No. AUS920000950US1

42. The computer program product of claim 31, wherein the content is at least one Web page.

5 43. The computer program product of claim 31, further comprising fourth instructions for modifying the content such that the content meets the accessibility requirement for the user.

10 44. The computer program product of claim 43, wherein the fourth instructions include instructions for changing values for tags in the content based on one of a rule set and an algorithm.

15 45. The computer program product of claim 43, wherein the second instructions include instructions for logging elements of the content that do not meet accessibility criteria, and wherein the fourth instructions include instructions for modifying logged elements to meet the

20 accessibility criteria.
